

Mandalay Aung

mandalay.aung@colorado.edu | (719) 644 - 9879 | [linkedin/mandalay-aung](https://www.linkedin.com/in/mandalay-aung) | Boulder, CO 80302

Education

University of Colorado Boulder

Expected May, 2028

Bachelor of Science in Electrical and Computer Engineering

Relevant Coursework: Data Structures, Computer Science C++, Embedded & Applications of Software, Digital Logic, Circuits and Electronics, Discrete Math, Programming Digital Systems, Electronic Design, Microelectronics

Professional Experience

Google - Software Engineer Intern
via Break Through Tech Sprinternship™

May 2026 - Present
Boulder, CO

- Building an intelligent chatbot with Google Cloud Platform that detects MSA policy updates and automatically delivers personalized compliance summaries based on each customer's active cloud infrastructure.
- Utilizing Python, Google Cloud Platform (ie. Vertex AI, Cloud Functions), and RAG based AI frameworks to build the pipeline.

Projects

TaskM - Full Stack Developer - Swift, Swift UI

February 2026 - Present

- Engineering a full-stack task management iOS app enabling healthcare caretakers at private care companies to schedule, assign, and communicate tasks across their team network.
- Designing scheduling views, task tracking, and company wide announcement features to streamline 24/7 care coordination.

BuffFocus - Frontend Developer - JavaScript, CSS, WebAudio API

March 2026

- Developed a fully operational cross-browser productivity extension in the 24-Hour HackCU12 Hackathon, helping students reduce distraction through task accountability and audio feedback.
- Constructed all frontend development, designing the extension's UI to deliver a distraction free user experience.

The EDU House - Software Lead - Arduino/C++

February 2025 - May 2025

- Spearheaded software development of an Arduino-based interactive educational dollhouse designed to teach children sustainable energy habits through a gamified embedded system.
- Designed and soldered circuit connections between Arduino Uno, LCD displays, and input peripherals, integrating hardware and software into a cohesive embedded product.

Skills

Languages: Python, C++, JavaScript, HTML, CSS, Verilog, Arduino (C/C++), Swift

Tools & Platforms: Git/GitHub, KiCad 10.0, VS Code, Arduino IDE, JupyterLab, LaTeX, AMD/Xilinx Vivado & Vitis, Diligent Waveforms, Xcode, Revit, Onshape, Microsoft 365

Hardware & Embedded: Arduino Uno, Diligent Analog Discovery 3, Boolean Board, Soldering, 2D & 3D CAD

Certifications: Google AI Essentials (Coursera), IBM Data Analyst Professional Certificate (Coursera)
